INTRODUCTION

This inventory is an effort to improve the working relationship between the University of California and local government through a knowledge of the resources, services and activities available at the Berkeley campus. The inventory includes official "organized research units", departmental study groups, graduate study programs, special collections and professional journals.

The effective use of this inventory requires an understanding of the different demands made on the academic and the practitioner. In general, the academic works in an atmosphere of research and state-of-the-art study. The practitioner is generally dealing with immediate short-term problems and with established techniques. The purpose of this inventory is to allow both operations to continue at their existing level while maximizing the exposure of both efforts to the benefit of each.

The objectives of the inventory are:

- Local government will gain an understanding of new techniques and ideas.
- The University will gain an understanding of directions for future study.

The inventory is organized to provide a single page summary of each activity. In order to facilitate obtaining information, a contact person is indicated in addition to the director. Where it is known that a resource costs money, it will be noted by the term "at cost". "General Areas of Impact" and "Related Activities" are noted in order to indicate possible opportunities for application and multiple operation. All the pages have been dated to relate to any future changes or updates.

A final note: the inventory has been written in the perspective of the practitioner at the local level. Consequently, the information was oriented to the jurisdictional and operational areas that are familiar to local government. In this manner, it is hoped that the University activities will be directed to the functional operations that would most benefit from the new concepts and sensitivities.

All corrections, additions and comments should be directed to Nicholas Bevilacqua, ITTE, 12 North Gate Hall, University of California, Berkeley, California, 94720.

INTRODUCTION

This inventory is an effort to improve the working relationship between the University of California and local government through a knowledge of the resources, services and activities available at the Berkeley campus. The inventory includes official, organized research units, departmental study groups, graduate study programs, special collections and professional journals.

The effective use of this inventory requires an understanding of the different demands made on the academic and the practitioner. In general, the academic works in an atmosphere of research and state-of-the-art study. The practitioner is generally dealing with immediate short-term problems and with established techniques. The purpose of this inventory is to allow both operations to continue at their existing level while maximizing the exposure of both efforts to the benefit of each.

The objectives of the inventory are:

- Local government will gain an understanding of new techniques and ideas.
- The University will gain an understanding of directions for future study.

The inventory is organized to provide a single page summary of each activity. In order to facilitate obtaining information, a contact person is indicated in addition to the director. Where it is known that a resource costs money, it will be noted by the term "at cost". "General Areas of Impact" and "Related Activities" are noted in order to indicate possible opportunities for application and further operation. All the pages have been dated to relate to any future changes or updates.

A final note: the inventory has been written in the perspective of the practitioner at the local level. Consequently, the information was oriented to the jurisdictional and operational areas that are familiar to local government. In this manner, it is hoped that the University activities will be directed to the functional operations that would most benefit from the new concepts and sensitivities.

All corrections, additions and comments should be directed to Nicholas Revickas, ITTE, 15 North Gate Hall, University of California, Berkeley, California, 94720.

LIST OF ACTIVITIES

Center for Real Estate and Urban Economics (ORU)*
Center for Research in Management Science (ORU)
Childhood and Governmental Project
Energy and Resources Program
Fire Research Group
Hospital Utilization Review Study
Institute of Business and Economic Research (ORU)
Institute of Governmental Studies (ORU)

ACTIVITY

Center for Real Estate and Urban Economics

DIRECTOR

Prof. Wallace F. Smith, 2420 Bowditch Street, (contact Patricia Sabin, 642-2491)

PROJECT DESCRIPTION

Conducts research in real estate and land economics and assists in improving methods in the industry and related government services. Its research program includes projects on real estate and housing market, finance, the organization and administration of the industry, and the economic, demographic and fiscal forces affecting urban growth.

COMMENTS

A list of publications is available at the project office.

ACTIVITY

Center for Research in Management Science

DIRECTOR

Prof. Frederick E. Balderston, 26 Barrows Hall, (contact Linda Berg, 642-4041)

PROJECT DESCRIPTION

An independent research facility engaged in research on management problems, especially related to man-computer interactions, large-scale organizations, and theoretical and experimental studies of individual and group decision-making.

RESOURCES

Publications, at cost

Management and Behavioral Sciences Computer Lab

GENERAL AREAS OF IMPACT

Management and Decision Making

RELATED ACTIVITIES

Operations Research Center

Institute of Governmental Studies

Institute of Business and Economic Research

Schools of Business Administration, Economics and Political Science

COMMENTS

The Management and Behavioral Sciences Laboratory has computer based capability available for a variety of man-machine interaction activities including gaming, simulation, and other management testing techniques.

ACTIVITY

Childhood and Government Project

DIRECTOR

Will Riggan, 2606 Dwight Way, (contact Jacqueline Janzen, 642-0910)

PROJECT DESCRIPTION

The project operates under a broad mandate to institute a program of research and training relevant to governmental policies that affect children. While the primary purpose is research, the project plans involve three commitments: 1) To pursue the ongoing social science and legal research, the central focus of which is the study of the proper allocation of power over and responsibility for children among parents, the child, and the state. 2) To continue the involvement, on a selective basis, in immediate reform efforts. 3) To continue the program of education, training, and dialogue.

ACTIVITY

Energy and Resources Program (a graduate group)

ADVISOR

Prof. John Holdgren, Room 100, Building T-4, Prof. Alan Lichtenberg,
Chairman, 642-4015. (contact Lee Schipper, 642-1640)

PROJECT DESCRIPTION

Offers courses and conducts and monitors research in the broad area of energy and the resources associated with energy; offers graduate degrees with interdisciplinary emphasis; provides assistance to campus organizations, government, industry and the public.

ACTIVITY

Fire Research Group

DIRECTOR

Prof. Robert B. Williamson, 543 Davis Hall, (contact Nancy Parsons, 642-5308)

PROJECT DESCRIPTION

Research into the fire process with special emphasis on the human factors and improved fire safety; the detailed mechanistic factors affecting combustion and firespread processes; and the modeling of flame spread over solid fuel surfaces and flame propagation. This research is applied to the structural response to fire loads especially in the single family dwelling.

A list of publications and a copy of the annual report is available at the project office.

ACTIVITY

Hospital Utilization Review Study

DIRECTOR

Professor Don C. Holloway, 2515 Channing Way, (contact Joseph Restuccia, 642-7457)

PROJECT DESCRIPTION

The project objective is to develop and evaluate methods for assisting "utilization review" committees in carrying out concurrent review of a patient's use of hospital resources, in accordance with the goal that medical services be furnished in the most economical location possible, consistent with good medical practices.

COMMENTS

An annual report listing the Institute's activities is available from the project office.

ACTIVITY

Institute of Governmental Studies

DIRECTOR

Professor Eugene C. Lee, 109 Moses Hall, (contact John Cummins, 642-1473)

PROJECT DESCRIPTION

The Institute conducts programs to increase the understanding of American politics and public institutions through the support of research in public policy issues and public organizations with particular emphasis upon state and regional/urban matters and through the collection and dissemination of information in documentary and machine-readable form. The Institute is the focal point on the Berkeley campus for relating research on public policy issues affecting state and local governments in California.

COMMENTS

A catalog of publications is available at no cost and updated every six months.

The Institute has a simulation instrument with capabilities for film and television visualization of urban development projects for lay publics and professional planners.

ACTIVITY

Leadership Program in Community Mental Health

DIRECTOR

Professor Robert Apte, 2515 Channing Way, (contact Linda Puttick, 642-4066)

PROJECT DESCRIPTION

A multi-disciplinary program to equip students and mental health professionals in the knowledge and skills to provide leadership in a variety of community settings which are concerned with the promotion of mental health and the reduction of the incidence and prevalence of mental disorders. Leadership roles include acting as consultants, planners, organizers, administrators and as program evaluators.

National Housing and Economic Development Law Project

DIRECTOR

Al Hirshen (housing), Arthur Blaustein and Michael G. Smith (economic development)
2313 Warring Street, (contact Bonnie Neeley, 642-2826)

PROJECT DESCRIPTION

The Housing Law section provides back-up assistance for Legal Services attorneys and undertakes research toward the development of proposed legislation and regulation in the following areas: landlord-tenant law; federal community development programs; management of Public Housing and FHA-subsidized housing; housing production, rehabilitation, contracting and employment; and mortgage foreclosure. The Economic Development Law section is engaged in the following activities: assistance to Legal Services lawyers and local Community Development Corporations (CDCs) ; liaison with federal and state agencies dealing with CDCs; and continuous research and education on specialized legal problems associated with CDCs.

ACTIVITY

Operations Research Center

DIRECTOR

Professor Roger Glassey, 3115 Etchverry Hall, (contact Barbara Brewer, 642-4993)

PROJECT DESCRIPTION

The Center is concerned with the problems of optimal operation of systems and the development of the theoretical basis for the solution of such problems. Past Programs include: water resources planning and management, solid waste disposal systems, traffic and transportation systems, financial planning, and manpower planning. Areas of research include mathematical programming, network flow theory, reliability theory, dynamic programming and optimal control theory.

SURVEY RESEARCH CENTER, 2538 Channing Way (415)642-6578

ADMINISTRATION

Director:	Professor J. Merrill Shanks	642-1104
Survey Services:	William L. Nicholls II	642-3086
Data Analysis:°	John L. McCarthy	642-6572
Data Library	Kathy Janes	642-6571
Business Office:	Eleanor Stevenson	642-6560

PROJECT DESCRIPTION

The Survey Research Center is a social science service facility for the University and public agencies, as well as a home for ongoing faculty research projects. The Center provides consultation, technical facilities, and specialized assistance for design, collection, and analysis of aggregate and survey data. SRC contributes to the formulation of educational and public policy through social science surveys and data analysis.

RESOURCES (all except limited consultation are provided at cost)

SURVEY SERVICES	DATA LIBRARY	DATA ANALYSIS
Study design	Bay Area Surveys	Analysis Design
Questionnaire Construction	National Surveys	Data Processing and
Sampling-- General or	Foreign Studies	Tabulation
Special Populations	1970 Census Data (1st	Computer Programming
Personal and Telephone	through 6th counts)	Statistical Analysis
Interviewing	Survey Instrument File	Non-credit Classes on
Coding and Key punching	Reference Services	Computer Analysis

GENERAL AREAS OF IMPACT

Community Information
Population Projections for California Counties, School Districts, and Colleges
Energy Consumption and Conservation Patterns
Housing Policy and Program Evaluation
Transportation Practices and Attitudes
Health Services Delivery

PROFESSIONAL JOURNALS

California Management Review

The Review is an authoritative source of information and ideas contributing to advancement of management. Intended to serve as a bridge between creative thought about management and executive action, it includes articles written by active managers, consultants, and academicians. Attention is given to the interaction of management and other disciplines. (Room 302 Barrows Hall, 642-7159, \$12/year).

Ecology Law Quarterly

The Quarterly is not another law review; it is a comprehensive and current journal of environmental law designed to be read, understood and used by professionals in all fields. ELQ combines legal analysis of judicial developments with authoritative reports on new legislation, new rulings and new technology. Engineers, ecologists architects, administrators, planners, executives and laymen are all served by the information in ELQ. (140 Boalt Hall, 642-0457, \$10.50/year).

California Law Review

A general review of local, state, and National Law published by the students of the School of Law at the University. (10 Boalt Hall, 642-7562, \$12.50/year).
